

Data Flow Diagram

Date	15 March 2026
Team ID	SWTID-2026-1038
Project Name	Auto Ticket Classification Using Flow Designer
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

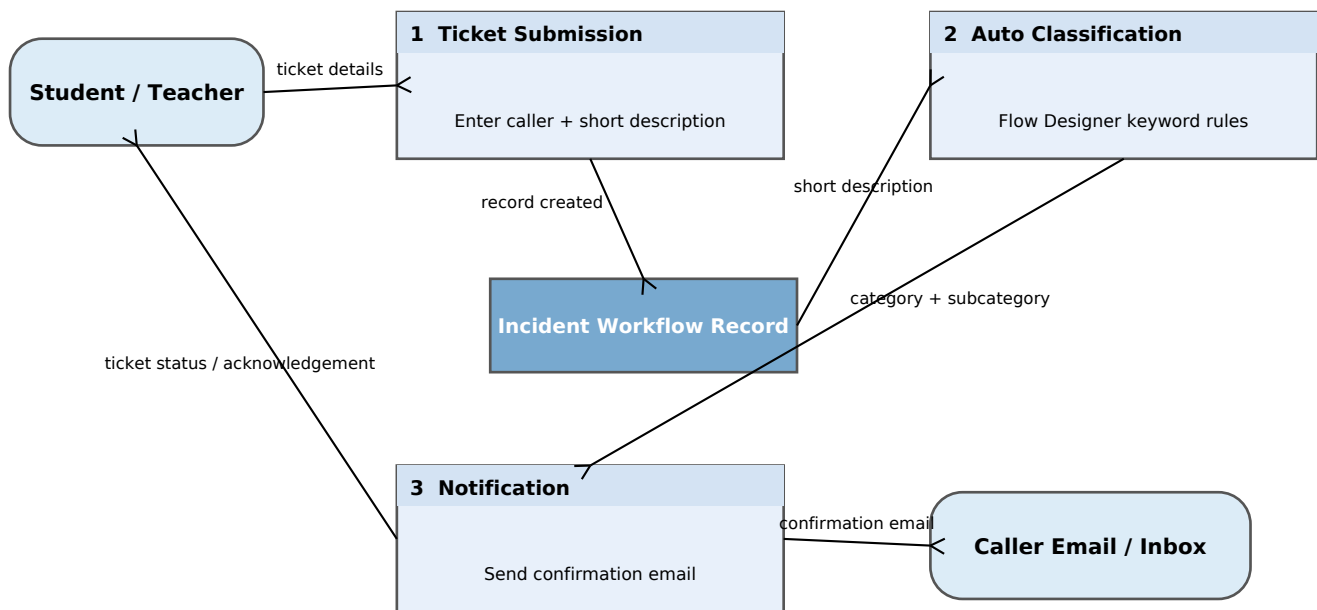

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data.
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data, such as ticket submission, classification, or notification.
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use, such as the Incident Workflow record.
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram for the Auto Ticket Classification system.

Example - Auto Ticket Classification Using Flow Designer

Project flow:

1) Requester submits a ticket → 2) Flow Designer classifies it → 3) Record is updated and confirmation email is sent.
Categories include Network/Wi-Fi, Hardware/Projector, Access/Forgot Password, and Performance/Slow Computer.
