

Problem-Solution Fit

Date	29 September 2026
Team ID	SWTID-2026-1038
Project Name	Auto Ticket Classification Using Flow Designer
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to show how the proposed solution addresses the root causes, behaviors, and limitations of the target users. The content is tailored to the Auto Ticket Classification Using Flow Designer project.

1. CUSTOMER SEGMENT(S) [CS] IT service desk agents, support teams, and organizations using ServiceNow for incident management.	6. CUSTOMER LIMITATIONS [CL] Manual classification takes time; inconsistent categorization; limited staff availability; repetitive ticket handling.	5. AVAILABLE SOLUTIONS [AS] Manual ticket assignment, predefined categories, scripts, and existing ServiceNow workflows. Pros: familiar and flexible. Cons: time-consuming and error-prone.
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] Tickets are manually reviewed and categorized, causing delays, inconsistent classification, and extra workload for support agents.	9. PROBLEM ROOT / CAUSE [RC] Lack of automated classification logic and dependence on manual interpretation of ticket details.	7. BEHAVIOR + ITS INTENSITY [BE] Agents repeatedly inspect ticket descriptions and assign categories, priorities, and routing information. High frequency during peak support periods.
3. TRIGGERS TO ACT [TR] New incident/ticket creation, incoming user request, or a ticket requiring category-based routing.	10. YOUR SOLUTION [SL] Auto Ticket Classification Using Flow Designer A ServiceNow Flow Designer workflow automatically analyzes ticket information, applies classification rules, assigns the appropriate category and routing details, and reduces manual intervention.	8. CHANNELS OF BEHAVIOR [CH] ONLINE ServiceNow portal, incident form, Flow Designer. OFFLINE Service desk operations and support-team follow-up.
4. EMOTIONS BEFORE / AFTER [EM] Before: repetitive work, uncertainty, and delays. After: faster handling, more consistent classification, and reduced manual effort.		

Project focus: Automate ticket classification in ServiceNow using Flow Designer to improve consistency, reduce manual effort, and support faster ticket routing.
